Attachments: ATSDR PFAS EPA-OCSPP.docx

Henry & Selene,

Attached are comments from EPA OCSPP on the PFAS toxicity profile. These, and all comments that EPA units have made on the PFAS toxicity profile are draft deliberative, and do not represent a formal EPA position. We hope that you have a productive and successful document review meeting today.

Subject: FW: ORD's final comments on ATSDR Tox Profile for PFAS

Henry & Selene,

Attached are additional comments from EPA ORD on the PFAS toxicity profile. I also expect to be forwarding comments from EPA's Office of Chemical Substances and Pollution Prevention by COB today. We apologize for the delay.

Subject: EPA comments on ATSDR Tox Profile for PFAS chemicals

Henry, Selene, and Bill (and Ed) - Thanks for sending the draft PFAS Tox Profile through Lynn Flowers for comment by EPA. Attached are deliberative comments from several EPA units. Please consider them draft as they have not been cleared through the EPA Office of Administrator. They do not represent a product of a formal EPA interagency review. I anticipate receiving more comments from other EPA units in the coming week. I will forward those separately.

We are willing to set up meetings or calls if necessary to clarify concerns that have been flagged. We could provide formal comments if requested through the standard executive channels.

I hope Atlanta is not too hot this time of year and that you are all doing well.

Thomas Sinks, Ph.D.
